

## ARCHANGELS AND THEIR CORRESPONDING CRYSTALS

Archangels are the managers of guardian angels and are very powerful and loving. They are genderless but their specialties and purposes favor either a male or female energy to them.

Each of the archangels has a particular aura color and gemstone that corresponds to them and you can use crystals to develop a closer relationship with each archangel.

There is no right or wrong way to summon these great angels and since they are omnipresent (being present everywhere) they can be with you and everyone who wishes at the same time.
