

Crystals work by balancing our “chi”, “prana”, or “universal life force”. Physical ailments have an underlying cause, and crystals will subdue this cause. A physical symptom may be the result of different underlying causes so if you do not find a benefit from one crystal, try another, or put different crystals together in a piece of jewelry to magnify the effects.

Please note that crystals are moving your energies so you might feel worse before you feel better. Do not worry about this as it usually subsides in minutes. Crystals can cleanse or detox the chakra system and as this happens, the physical symptoms might move to other areas of the body. The crystals will bring up issues that you might not want to face but if you let them work without resistance, your health and emotional wellbeing will improve. When energies are unbalanced, we are in a state of disease and we become increasingly susceptible to all kind of illness. Angelite, blue lace agate, calcite, carnelian, crazy lace agate, emerald, jade, opal, clear quartz, ruby, rutilated quartz, silver, tiger’s eye, and tourmaline all help to balance our energy and remove disease.

The following is a list of physical ailments and the crystals that correspond to these ailments. If the remedy you seek is more of an emotional or spiritual state, please contact me and I can suggest and create jewelry to accommodate this ailment.
